

### Main Features

- Developed for protecting the aluminum profile surfaces by coating the surface with protective foil
- It takes only 15 seconds to apply protective film on to a 6 m long aluminum profile
- Equipped with double axis drive system
- Pressure can be adjusted manually
- Travelling speed is controlled
- Conveyor motor power: 0.37 kW
- Working width: 200 mm
- Delivered complete with loading and unloading conveyors

### Optional Features

- Applying protective tape on 3 side of the profile at one time
- Applying protective tape on 4 side of the profile at one time
- Working width: 300 mm

## AN EASY AND EFFICIENT WAY TO PROTECT ALUMINUM SURFACES
